Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Thompson Farm complex consists of a house, small barn and several frame sheds. The twentieth century farmstead may have components that were part of an earlier nineteenth century farm, most notably the barn.

House (1910-1920)

The 2-1/2 story, frame house is two by four bays with a metal gable roof parallel to the road, cornice returns and a gable dormer on the west side. An interior brick chimney is located on the south gable end beside an interior cinder block chimney. The open porch on the principal [west] facade has wood posts, metal shed roof and wood balustrade. Fenestration consists of one-over-one, wood double-hung sash on all elevations with smaller one-over-one sash on the upper level, gable ends. A one story, vinyl-sided enclosed porch addition is affixed to the north elevation. It is two bays by one bay and may serve as a mud room area for the kitchen.

Barn (1860-1880)

The barn appears to predate the main house by about 50 years. The two story frame with fieldstone foundation barn is located well to the north of the main house along North Carroll Lane. The structure has a metal gable roof with ridge line parallel to the lane and three lightening rods. The barn is an English barn built on a small rise with an artificial ramp on the north elevation.

Outbuildings (1880-1910)

Between the house and the barn are two outbuildings. The larger structure is a frame with metal gable roof carriage house while the smaller one is wood with metal gable roof. Both structures are now used for equipment storage.

and/or

Applicable Exception: ☐ A ☐ B ☐ C ☐ D ☐ E ☐ F ☐ G

Level of Significance: ☐ national ☐ state ☐ local

Prepare both a summary paragraph of significance and a general statement of history and support.

The early history of this property is not known as it does not appear on the 1862 Martenet Atlas, the 1877 Lake, Griffing and Stevenson Atlas or the 1916 Rand Mc Nally Atlas. The latter is not an all-inclusive atlas so the house may have been in existence prior to 1916.

The barn is older than the house, which leads to the possibility that the barn was part of a nineteenth century farm and the current house either replaced the original house or the two farms were combined and the nineteenth century house and outbuildings removed. The house is a twentieth century rural vernacular farmhouse with simple Victorian embellishments common to the area.

Evaluation:

The Thompson House constructed circa 1910-1920 is not eligible for the National Register. The property is not eligible under Criterion A; no significant events historically or agriculturally have been determined to be associated with the property. The property is not eligible under Criterion B; no persons significant in local, state or national history have been determined to have been associated with the property. The property is not eligible under Criterion C; the property is not a significant example of its type, design or manner of construction. There are more significant and intact examples within the project area.
